

Battery Chargers

AgSafe Safe Work Procedure

1. When hooking up a battery charger to a battery, C.S.A. approved safety goggles must be worn.
2. Prior to hooking up to the battery insure that the battery charger is unplugged, and that the cord is not damaged.
3. Before connecting the battery ensure that the battery is level and that there is no possibility of it getting knocked over.
4. Prior to connecting the battery make sure all connections are clean.
5. While connecting the battery ensure that all contacts are solid and secure.
6. Always connect the positive cables first then the ground.
7. When disconnecting always remove the negative cable and then the positive.
8. Prior to plugging in the battery charger ensure that there is no one in the immediate area in the event of an explosion.

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
