

# Corn Harvester

## AgSafe Safe Work Procedure

1. Install the manufacturer's guarding plus any other guarding on tractor mounted units
2. Reduce the chances of plugging and associated injury by maintaining proper ground speed
3. Adjust the snapping rolls and gathering chains for good stock feeding
4. Disengage the power and shut off the engine before dismounting or attempting any service or unplugging
5. Material feeds faster than you can let go ensure all power sources are eliminated prior to unplugging
6. Never turn too sharply especially on hillsides
7. Never stand while operating the corn harvester
8. Keep steps and platforms clear
9. Prevent fires by using a radiator screen. Shield manifold and muffler from leaves and other flammable materials
10. Provide a fire extinguisher on the equipment

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
