

# Electric Drills

## AgSafe Safe Work Procedure

1. Eye protection (C.S.A. approved safety goggles) must be worn at all times while using an electric drill.
2. Wear hearing protection, if only doing small job amount of drilling insert earplugs, if working with drill for prolonged periods of time earmuffs are recommended.
3. If you drill through a wall to an open area on the other side the check to ensure that there is nothing on the other side prior to starting to drill the hole.
4. Prior to plugging in the drill examine the cord to ensure that there is no damage that could cause an electrical shock.
5. Prior to starting to drill the hole make sure that the area is free of debris to prevent you from slipping or falling when applying pressure to the drill.
6. Do not set the drill down until it has stopped turning.
7. When not using the drill makes sure that it is unplugged.

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
