

# Emergency Procedure: Medical

## AgSafe Safe Work Procedure

1. If medical emergency has imminent threat to the victim/person...
  - a. Remove the threat if possible rather than the patient from the threat
    - i. i.e. in a pen with bull that is aggressive, remove the animal from the victim to a safe location close gate to restrict re-entry to your position
2. Call 9-1-1 or ensure that this call has been made
3. Summon first aid attendant; commence first aid if a practitioner
4. Remain calm
5. Ensure that there is someone awaiting medical emergency responders to show them how to safely access your location
6. Additional staff can ensure easy access to the site of the incident, move machinery open gates etc...

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
