

Fire Protection

AgSafe Safe Work Procedure

1. Develop an emergency fire plan and post it in all work areas
2. Consider holding fire drills for employees
3. Choose the appropriate types of fire extinguishers for the type of fire most likely for the area
4. Ensure that there are adequate numbers of extinguishers and conspicuously marked
5. Inspect extinguishers regularly to make sure they are fully charged and are ready to use
6. Make sure there are adequate well marked exits to allow prompt escape
7. Where necessary, equip exit's with emergency lighting
8. Ask for a fire inspection by your local fire department

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
