

Gas Operated Pressure Washer

AgSafe Safe Work Procedure

- 1) Eye protection must be worn while operating a pressure washer. The minimum standard being C.S.A. approved safety goggles.
- 2) Prior to starting the machine check to ensure that all fittings are tight to safeguard against pressure blowing them apart.
- 3) While operating the machine keep a watch on the hose to make sure that it does not tangle causing an excessive buildup of pressure.
- 4) Never point the nozzle at yourself or anyone else in the area.
- 5) When you are finished with the machine make sure that the pressure in the hose is released.
- 6) Always coil up the hose so as not to cause a tripping hazard.
- 7) Turn off the pressure washer prior to refueling.

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
