6. Identification of known fractious animal i.e. foot band etc. to alert worker of danger.
7. Rubber gloves available to worker and eye protection.
8. Good clean hand washing facilities should be available to worker.
9. If worker is alone at night during milking a Safe work procedure for Lone worker needs to be implemented

Procedure

Before you start

1. Inspect required personal protective equipment and replace if required
2. Put on all required personal protective equipment
3. Alert employer that you have started work via lone worker procedure if applicable

While you're working

1. Collect cows from cubicle barn and bring to milking parlor
2. Identify known difficult cows by colored leg bands
3. Teat stripping
4. Pre-dip of teats
5. Wiping teats
6. Placing milking machine on cow
7. Removing Machine and Post dip of teats
8. Repeat
9. Should you have difficulty with a fractious cow notify your supervisor immediately and avoid contact until assistance arrives

After you finish

1. Return cows to barn and close respective gates.
2. Wash down plant and apply detergents as required using appropriate handling precaution.
3. Notify lone worker check in that you are finished chores and leaving farm safely.

If an emergency situation occurs while conducting this task, or there is an equipment malfunction, shut the equipment off immediately and follow the lock out procedure.
