

Utility Knives

AgSafe Safe Work Procedure

- 1) When using a knife always make sure that you cut away from yourself.
- 2) When using a razor knife wear leather gloves that have the fingers removed.
- 3) When using a razor knife never have the blade fully extended while cutting.
- 4) Always make sure that the blade is sharp or new. Do not use a dull blade as this will cause you to use extra force which could cause you to slip and cut yourself.
- 5) When not using the knife make sure that the blade is fully inside the case so as not to pick it up and cut yourself.

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
