

Weedeaters

AgSafe Safe Work Procedure

1. Perform a site inspection before cutting, remove and stones, glass, metal, trash, and other solid objects from site.
2. Never use wire in place of nylon culling line.
3. When using bush blade to cut woody materials use left side of the blade to avoid kick out. If you hit a foreign object with blade stop the unit and inspect it for damage. Replace any damaged parts before restarting.
4. Wear eye protection and long legged pants at all times when operating a weedeater.

To Start Weedeater

1. Place unit on the ground; ensure cutting head clears the ground.
2. Hold unit with left hand and press down firmly, do not stand or kneel on the drive shaft.
3. Pull starter grip slowly with right hand until you feel it engage, and then give it a brisk string pull.
4. Always guide starter rope slowly in to recoil.

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
