Procedure if Ambulance is Unavailable

First Aid person and assistant stay with the victim and determine if moveable

Transport Vehicle Will Be	
Inform 9-1-1 operator of route being taken to hospital	
Cell phone numbers for 9-1-1 operator	

Emergency Transport of Injured Worker

- **First aid attendant attends to injured worker**
 - First aid attendant determines if patient can be moved to first aid room

- **Emergency Responders are contacted as required Police, Fire, and Ambulance**
 - Designate a person to meet the emergency crews and lead them to scene

- **Should the ambulance be unavailable and transport of the injured person is required the following procedure shall be followed**
 - The supervisor or shift foreman/charge hand will obtain the most suitable transport vehicle and will be the designated driver

 - In the event the supervisor foreman/charge hand is also first aid attendant then a driver shall be designated by the supervisor foreman/charge hand

- **The driver shall proceed with all due prudence to the nearest medical aid facility or arranged location to meet the ambulance**
 - The first aid attendant and any requested additional travel aid personnel shall concentrate upon the patient

 - A member of the transport team should attempt to contact the destination medical facility by phone to advise of the incoming patient and the situation

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
