

Front End Loader

AgSafe Safe Work Procedure

1. Carry loads low
2. Back down **ALL** slopes
3. Keep speeds to maximum 6 km per hour (4 mph)
4. Check often for stress at joints and pins
5. Check for evidence of metal fatigue or stress
6. Check front tires for excessive wear, cracking or stress
7. Balance the tractor as required to handle the load
8. Never work under a raised mobile bucket

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
