

Walk Behind Beater

AgSafe Safe Work Procedure

1. Complete your pre – operating inspections.
2. Going in and out of the bogs involves going up and down which will require assistance. DO NOT attempt to move the beater in or out of a field without proper assistance. The person assisting should ALWAYS be uphill from the beater.
3. Before attempting any cleaning or servicing of any kind the beater motor MUST be shut off.
4. Be aware of the perimeter ditches are and where they drop off.
5. Always maintain a safe operating distance from others. Stay a minimum of 15 feet behind when following another beater. Do not have a beater running if there is anyone within 15 feet of the beater.

Please use the following **Safe Work Procedures** as a guideline to building your own safe work procedures.
